 - Metal – 26 tons
 - Organisations – 133 tons
-
- Recycled – 652 tons
 - 12.95% year/year growth
 - 9927 PCs recycled
 - 9467 Screens recycled
 - 1939 Fridge/freezers recycled

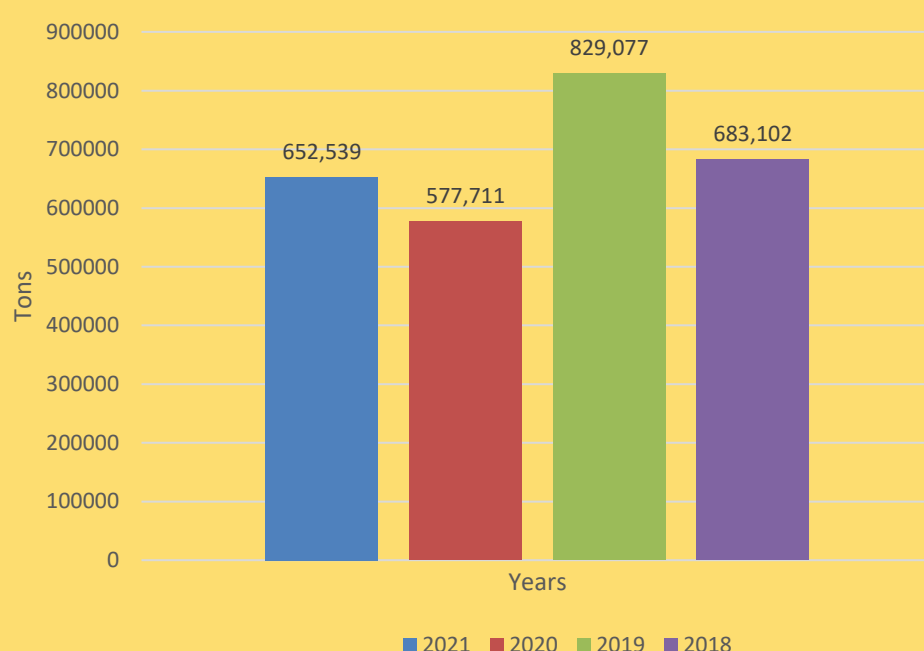

Recycling Update

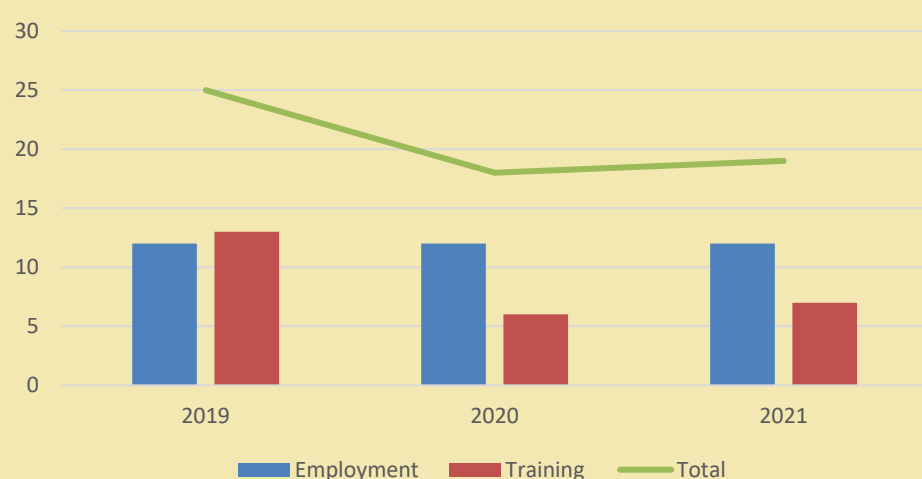

Recycle IT work in collaboration with WEEE Ireland who each year support the recycling of over 37,000 tonnes of waste electrical items including up to 120,000 fridges and 200,000 TVs and screens

Recycle IT contributed 652 tonnes to this total in 2021. Our teams support collections or drops offs from households, charities, community groups and schools having limited options available for recycling WEEE. Recycle IT also collect cost-effectively from small and medium-size business organisations.

Recycle IT Employment and Training Positions

Employment Update

In December 2021 Recycle IT provided employment and training positions to 18 persons. This represents a 30.7% decrease on March 2020 when Recycle IT closed due to the COVID 19 pandemic. On reopening employment and trainee numbers have recovery slowly. Today market factors including skills shortages and wage levels in some sectors (transport) and employment schemes rules are causing difficulty in recruiting trainees and full-time employees.
